

IBP Cloud Suite

Saddle Point IBP Cloud Suite is a fully integrated, easily configurable and feature rich cloud based planning suite with a SaaS offering. Planning modules like Demand Planning, Supply Network Planning, Production Planning, Production Scheduling, Inventory Planning, Procurement Planning, Transportation Planning, Vehicle Route Planning, Workforce Planning, Shift Scheduling etc. make this an ideal platform for an end-to-end integrated planning across the organization.

The cloud based IBP solution is extremely useful for mid-sized companies looking for user friendly, feature rich and cost effective solution.

Features

- A complete cloud based offering without any client side installation
- A multi-tenant, multi user platform with fully integrated planning modules for end to end planning
- Options for both Optimization and Heuristics based constrained planning
- The SaaS based offering lowers the TCO
- Each module will be seamlessly integrated with other modules
- End to end planning on a single platform
- Seamless integration with third party ERP systems
